•	comment:	50X1-HUM	
. •	a. expansion work started at the lending field and thus confirm other reports of January 1950. No exact statements on the extent of the construction work have been received.		
	b. Report confirms that no gir unit is stationed at the field. According to the reported motor vehicle and the information in para 4, however, it is assumed that an air force ground unit is still stationed in mittstock. It is therefore expected that the field will later be re-cocupied by an air unit.	50X1-HUM
